ABOUT THE COURSE

Full Stack Developers are in high demand in today's job market. Facebook, Google, Uber and countless so-called Unicorn startups have been achieving great heights because of their technology stack. A rigorous learning program for beginners and professionals to learn various technologies to become full stack development from scratch. A comprehensive course intends to develop you as a master in coding and development.

The course will commence with understanding the basics of Web Development, through case studies and practical exploration of Core Python, Advance Python, and Database. Afterwards, you will get to create console based projects.

Next up you will learn HTML, CSS & JavaScript and understand the concept of Bootstrap.

Basics of Django, Creating apps in Django, Templates, URL Routing, Database Connectivity, Django ORM, Authentication, CRUD Operations and much more. You will be guided to create dynamic applications using Django.

After learning Django, you will get your hands on REACT , you will learn how to use React and build beautiful SPAs(Single Page Applications). You will also be taught Web developer tools like element inspection, colour picker to add to your arsenal.

Now it's time that you learn how to build and manage versions of your project. And also learn in-demand GitHub Version Control System. Using this knowledge you will be able to manage versions & collaborate with your team

It's time to go live! You'll learn Cloud Computing . You will also learn Cloud Technologies. Through case study you'll understand workflow of Deployment Process of an application. Learn how to use AWS Services , S3 to store data, and relevant technologies.

Using all the things which you have learn ,we will help you to build your own awesome projects that you can showcase to employers.

WHAT WILL YOU LEARN

CURRICULUM

1] Core Python

- An Introduction to Python
- Program Flow Control
- Logic Building
- List, Ranges, Dictionaries, Tuples and Sets in Python

2] Advance Python

- File Input and Output in Python
- Object Oriented Programming in Python
- Exception Handling in Python
- Decorators, Iterators and Comprehensions
- Multithreading in Python Programs

3] Database

- Structured Query Language
- Python Database Connectivity (PDBC)

4] ORM Tool

- SQLAlchemy - Object Relational Mapper

5] FrontEnd

- HTML5
- CSS2
- Javascript

CURRICULUM (continued...)

6] BackEnd Framework

- Django Framework

7] FrontEnd Framework

- React JS

8] Capstone Project

9] Version Control System – Github

10] Cloud Computing

- Introduction
- AWS & Services
- Amazon Simple Storage Service (S3)

We provide 1:1 placement coaching in a series of sessions

WHAT OUR CERTIFIED STUDENTS SAY ABOUT OUR COURSE?

Pramod Marathe

If I am share My experience with the Adhyayan IT Training And Placement institute, including aspects like the quality of instruction, practical application of skills, and any support provided by the trainer. It was great Experience here As a Student.

Sejal Thombre

I'm doing full stack python course at Adhyayn IT Training and Placement. This is best place for learning programming languages. Teacher here is excellent... plus point of this class is he cover each topic deeply and repeatedly and explain practically and also help to increase student confidence and build logical thinking for program.
